OBJECTIVE

To secure a suitable role as a frontend developer in a company where I can develop my skills and gain experience while contributing to the growth of the organization.

EDUCATION

Master of Computer Applications, Utkal University   2022 - 2024

Bachelor of Computer Applications, Utkal University   2019 - 2022

SKILLS

Languages	Java ,Javascript
Technologies	HTML, CSS, Tailwind CSS, MySQL
Developer Tools	Git, GitHub

PROJECTS

YouTube Clone

- Our basic YouTube clone project is a web application created using HTML, CSS, designed to mimic the fundamental features and functionality of the popular video-sharing platform. Users can browse and view videos in a familiar grid layout, with options to search for specific content, play videos, and interact with comments. (Try it here)

- The interface closely resembles that of YouTube, featuring a header with navigation links, a search bar, and suggested videos based on user activity.

MetaFinder

- MetaFinder is a web application that aggregates real-time data from various sources like Google, Unsplash, and news outlets, providing users with a comprehensive database of images, articles, and information.

- The platform offers advanced search and filtering tools to help users find exactly what they need, and keeps them updated with the latest trends and news in their areas of interest. (Visit the website)

ACHIEVEMENTS

- Achieved a prestigious 4-star ranking on HackerRank for exemplary problem-solving skills in Java and MySQL. View HackerRank Profile

- Successfully tackled over 170 challenging problems on LeetCode, demonstrating proficiency in algorithmic problem-solving. View LeetCode Profile

- Completed a rigorous 50-day coding challenge on LeetCode, maintaining an impressive 75-day maximum streak, showcasing dedication and consistency in honing coding skills. View LeetCode Profile
