

Certifications | Internships

Geekster | Geekster Full Stack Web Development Bootcamp

- Solved 400+ DSA/Coding questions on geekster platform
- Participated in various Coding contests organised by the platform.
- Worked on various projects like **Full-Stack Job Portal** , **Full-Stack Grocery Delivery Website**.
- Technical Stack Learned : **HTML, CSS, JavaScript, Tailwind Css,React,MongoDB,Express.js,Node.js**

Projects

Full-Stack Job Portal [\[Check It Here\]](#)

- Developed a job portal enabling job seekers to sign up, sign in, update, and delete their profiles, view job postings, apply for jobs, and upload or edit resumes. Recruiters can sign up, sign in, add job postings, manage job visibility, approve or reject job applications, and download resumes. Ensures secure authentication and authorization for both job seekers and recruiters.
- Key Features:** Job seekers can manage profiles, view and apply for jobs, and upload/edit resumes. Recruiters can post jobs, control job visibility, approve/reject applications, and download resumes.
- Tech Stack:** React, Clerk, MongoDB, Express, Node.js, Tailwind CSS, Git version control.

Full Stack Grocery Delivery Website [\[Check It Here\]](#)

- Developed a full stack grocery delivery platform – Green Cart – that allows customers to browse products, manage cart items, place orders, and track order history, while admins can manage inventory, update product listings, and monitor customer orders. The platform includes secure authentication and authorization using JWT.
- Key Features:** Customers can register, log in, browse grocery items, search and filter products, add to cart, place orders, and view past orders. Admins can log in to manage product listings, update stock and pricing, and track customer orders.
- Tech Stack:** React, Node.js, Express, MongoDB, JWT (Authentication & Authorization), Tailwind CSS.

Google Drive Clone [\[Check It Here\]](#)

- Developed a Google Drive clone using React and Material UI, integrated with Firebase for real-time file storage and Google Authentication. Implemented core features like file upload, deletion, search, sort, dark mode, and a built-in chatbot.
- Key Features:** Integrated Google Authentication for secure login. Enabled real-time file upload and storage management through Firebase. The application offers a seamless and responsive user experience similar to Google Drive.
- Tech Stack:** React JS, Material UI, Firebase (Real-time Database and Authentication), Git version control.

Skills

- Languages:** Java, Javascript
- Technologies:** HTML, CSS, Tailwind CSS, React,MongoDB,Express.js,Node.js
- Developer Tools:** Git, GitHub

Education

Year	Degree/Examination	Institution/ Board	CGPA/Percentage
2024	MCA	Utkal University	7.91 CGPA
2022	BCA	Utkal University	8.03 CGPA
2019	12th	CHSE	76 %

Achievements and Co-Curricular Activities

- Achieved a prestigious 4-star ranking on HackerRank for exemplary problem-solving skills in Java and MySQL.
[View HackerRank Profile.](#)
- Solved 170+ problems on LeetCode and completed a 50-day coding challenge. Maintained a 75-day streak, showing strong problem-solving skills and consistency.[View LeetCode Profile.](#)
